

Race Plan & Track – Quick User Guide

This quick reference guide explains how to use the Race Plan & Track web app on mobile phones and desktop computers. It is designed for a wide range of users, from teenagers to older adults. The guide focuses on the most common tasks.

1. Race Setup (Plan your race)

1. Select a Race Preset (for example 400m, 800m, 1500m).
2. Choose how to calculate splits:
 - Goal time – enter the total race time.
 - Average target pace – enter pace and unit.
3. Choose Split Type:
 - Even splits – same effort throughout.
 - Negative split – finish faster.
 - Positive split – start faster.
4. Tap “Calculate splits” to generate your target splits.

2. Viewing & Copying Target Splits

After calculating splits, a table appears showing:

- Lap number
- Distance
- Split time
- Cumulative time
- Pace per kilometre

Copy options:

- Image – best for messages or email.
- Table – best for notes or spreadsheets.

3. Custom Presets (Optional)

You can create your own race presets:

1. Tap “Show create / manage custom presets”.
2. Enter a preset name.
3. Enter lap distances separated by commas (e.g. 300, 400, 400, 400).
4. Save preset.

Custom presets can also be deleted from this section.

Note: Custom presents will remain available until you refresh the app. If you have race formats that you want added to the permanent list, please contact the administrator.

Lap	Distance (m)	Split	Cumulative	Pace (/km)
1	300	1:00	1:00	3:20/km
2	400	1:20	2:20	3:20/km
3	400	1:20	3:40	3:20/km
4	400	1:20	5:00	3:20/km

Hide create / manage custom presets

Preset name
A name you will recognise later
e.g. 1500m (school track)

Lap structure (metres)
Enter each segment, separated by commas
e.g. 300, 400, 400, 400

Save preset

Delete a custom preset
Select a custom preset you created and remove it
No custom presets yet

Delete selected preset

4. Race Tracking Stopwatch

The stopwatch appears after splits are calculated.

How to use:

1. Tap Start to begin timing.
2. Tap Lap at each lap marker.
3. The app compares your actual time to target time.
 - Green = ahead/on target
 - Red = behind
4. Tap Reset to clear and start again.

5. Copying the Lap Log

After recording laps, you can copy the lap log:

- Image – share results easily.
- Table – paste into notes, email, or Excel.

On mobile, a share menu may appear instead of copying directly.

Tips

- Always calculate splits before using the stopwatch.
- On mobile, scroll down to see results and stopwatch.
- Use Image copy for messaging apps.
- Use Table copy for detailed analysis.
